Culturally Proficient Coaching is a guide to engaging in constructive conversations around critical issues in education. This book study provides a road map for educators to examine their personal values, beliefs, and assumptions about the communities they serve with the goal of promoting equitable interactions.

Author Delores Lindsey and her team of authors invite readers to harness the power of Cognitive Coaching and the Cultural Proficiency Framework to develop coaching strategies that will prepare them for difficult conversations and tools to confront and overcome inequities in education.

Whether you are an administrator coaching educators; an educator coaching colleagues; or a teacher coaching students - you will benefit from both this conversational skill set, as well as joining this network of professionals! No matter how you define the role of coach, and no matter which coaching model you follow, this is the resource to help you get started.
